The course is provided by the University of Skövde and is named Logistics - Supply Chain Management and Sustainability G1F. It comprises 7.5 credits and is on basic level. The level of progression of the course is G1F.

2 Objectives
After completed course the student should be able to:

Knowledge and understanding
- explain the basic concepts of logistics as well as explain and explain the impact of logistics on companies and organizations,
- describe and analyze logistics processes within and between companies,
- account for the importance of information flow in logistics,
- understand the relationship between economic instruments and their relationship with inventory, and transports,

Skills and abilities
- critically review and analyze long-term sustainability linked to supply chains and circular economy,
- account for and carry out simpler analysis of the environmental impact of logistics and primary transports,

Judgment and approach
- identify the consequences of inadequate regard to sustainability dimensions when planning and managing logistics systems.

3 Course Content
The course aims to give the student a basic knowledge of logistics and its role in business activities and its importance in achieving sustainable supply chains. Logistics is based on flows within and between companies. This includes flows of goods, services as well as information and monetary flows. In addition, logistics is about managing and developing these flows from cradle to cradle where interaction between different actors is addressed. Return flows in supply chains that are essential to long-term sustainability are also addressed and problematized.

4 Forms of Teaching
The teaching comprises lectures and seminars.

The teaching is conducted in English.

5 Examination
The course is graded A (Excellent), B (Very good), C (Good), D (Satisfactory), E (Sufficient) or F (Fail).
